

AUTOMATIC CUT & TRANSFER - COILING & SPOOLING

**NEW
COMPACT**

Innovative Flexible Material Spooling & Coiling Solutions

EQUIPMENT BENEFITS

The ACT System Offers

- Higher standard speeds reaching 1000 fpm.
- Clean room ready for medical applications.
- Best available package quality with servo driven indexing turret and material guide arm.
- Precise speed and tension controls with all servo drives.
- Superior safety with a standard "S" guard isolating the operator from the "run" side and optional full guarding with failsafe interlocks.
- Maintenance friendly design with easy access to mechanical and electrical components. System offers far fewer moving parts over the competition.
- Highly reliable with operational longevity and reliability a central focus in the design and testing resulting in lower cost of ownership.
- Greater customer flexibility with non-proprietary control system.
- Convenient mobility with optional pneumatic floor locks allow movement without the use of tools.
- Best in Class package flexibility whether it be spools or coils, through flange or periphery cutting, all can be addressed.
- FDA approved materials used.

The ACT Systems Innovative Options:

- Auto Coil & Spool Unload
- Auto Packaging (tape, tie, wrap)
- Material Auto Start-up/String-up Assist
- Tension Control & Linear Measurers
- On-Line Printing & Testing

ACT - Automatic Cut and Transfer Coiler and Spooler

- The ACT System is highly flexible and reliable applicable to multiple products and applications. Now operating on and offline wire and cable, medical tubing and plastic profile on applications.
- The ACT System offers a standard, non-proprietary control system adaptable to numerous applications with access by operational and maintenance personnel.
- The ACT System touts a robust yet user friendly color interface includes screens for all parameters including performance, operation, maintenance, safety, and recipe management.
- The ACT System offers fast return of investment when replacing manual machines with improved safety and one operator to operate multiple lines.
