

MODEL 1706

Material Measuring Meter

For Flexible Material 1/2" to 6" Diameter .5% +/- Accuracy.

1706 Material Measuring Meter

MODEL 1706

Material Measuring Meter

Standard Features:

The ReelPower model 1706 measurer is designed to measure heavy and large diameter cable such as wire rope and larger power cable.

The pivot arms and springs keep the measuring roller tightly clamped against the cable to ensure accurate measurement.

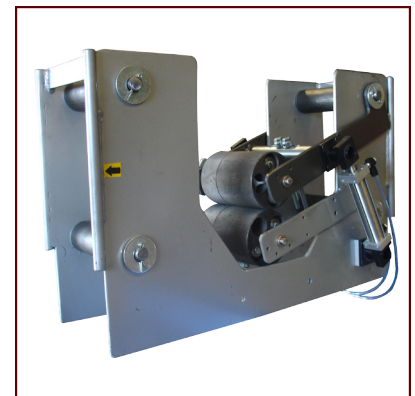

The heavy top and bottom rollers make it easy to pull material from the pay-off.

Options:

- Side loading
- Remote Read out
- Metric Counter
- Integral Cutters
- Knurled or Urethane Coated Wheels
- Predetermined Stop-To-Length Counters (ESTL)
