

TRAVERSING REEL TAKE-UPS

Innovative Flexible Material Spooling & Coiling Solutions

REELPOWER

Traversing Reel Take-ups and Payoffs are some of the most advanced on the market today. The units traverse the entire reel in front of the material line, creating an optimum layer wound package.

The overhead beam and traversing reel design minimizes line lengths requirements. Main drive systems are engineered to customers' specifications and equipped with an operator color touchscreen interface.

Traversing frame, pintle arm and cantilevered shaft style units are also available.

REELPOWER Model TRTU-36 Overhead Beam

Equipment Benefits

- Overhead Beam Design
- Roll Thru Capabilities
- Zero Material Fleeting Angle
- Increased Productivity
- Superior Levelwind Capabilities
- Processes Round, Flat and Rectangular Product
- Minimal Line Lengths

MODEL	REEL MIN/MAX DIAMETER	REEL MIN/MAX WIDTH	WEIGHT CAPACITY	SPEED
TRTU-36	30in (762mm) / 36in (914mm)	13in (330mm) / 21in (533mm)	2TONS (4000LBS)	1200 FPM

TRAVERSING REEL TAKE-UPS

Innovative Flexible Material Spooling & Coiling Solutions

Tulsa Power Model TFTU-48 Pintle Arm Style

MODEL	REEL MIN/MAX DIAMETER	REEL MIN/MAX WIDTH	WEIGHT CAPACITY	SPEED
TFTU-48	42in(1,066mm) 48in(1,220mm)	18in(457mm) 24in(609mm)	.75T (1,500LBS)	500 FPM

Tulsa Power Model CTRTU-24 Cantilevered Shaft Style

MODEL	REEL MAX DIAMETER	REEL MAX WIDTH	WEIGHT CAPACITY	SPEED
CTRTU-24	24in (609mm)	15in (381mm)	.5T (1,000LBS) PER POSITION	500 FPM
