For pulling material from Pay-out equipment, or for in-process applications such as extruders, drawing lines, stranding lines, printers and automatic cut-to-length braiders. “Caterpullers” and Capstans both standard and custom, are available to operate with other Reel-O-Matic equipment and/or existing process lines. Based upon material type and size, as well as line speed and line pull requirements, Reel-O-Matic will provide a system to meet your precise specifications.
Custom-Made Material Pullers
